

**TITLE**

**YEAST WITH HIGH BIOTIN-PRODUCTIVITY AND THE PREPARATION  
METHOD THEREOF**

5

**ABSTRACT OF THE DISCLOSURE**

The invention discloses a yeast with high biotin-  
productivity and the preparation method thereof. The yeast  
is transformed by an integrated plasmid, which includes a  
biotin synthase gene, an assistant DNA sequence for the  
10 integration of the plasmid into a host genome, a promoter  
sequence, and a selection marker.
